### WORK EXPERIENCE

2021 - present	POSITION: Associate Professor
	INSTITUTIONAL ADDRESS University of Naples Parthenope
	Research Topics: Numerical Analysis, Parallel Algorithms, High Performance Computing
	Research or Industry:
2006 - 2021	POSITION HELD: Assistant Professor
	INSTITUTIONAL ADDRESS University of Naples Parthenope
	Research Topics: Numerical Analysis, Parallel Algorithms, High Performance Computing
	Research or Industry:
2004-2006	POSITION HELD: Researcher
	INSTITUTIONAL ADDRESS University of Naples Federico II
	Reserach Topics: Image processing, Numerical Analyss, Parallel Algorithms

## EDUCATION AND TRAINING

2004	PhD in Computer Science
	University of Naples Federico II
Topics: Image processing, Inverse problems, PDE methods for Image and video enhancement. Parallel Computing	
2000	M. Sc. In Mathematics
	University of Naples Federico II
Topics: Image processing, Algebraic Methods for features extraction and filtering.	

## ADDITIONAL INFORMATION

2018	ASN
2000-present	The research activity focuses on Scientific Computing and it is primarily concentrates on Numerical Analysis and Parallel Computing for numerical solution of large-scale applied problems of physical and environmental domains, using HPC environments.  More specifically, the scientific interests are concentrated on studying parallel methodologies that best adapt to emerging architectures (multiprocessor, multicore, GPU), for: solving ill-posed inverse problems underlying the analysis and processing of digital images, data scattered interpolation for surface reconstruction and filtering and data assimilation in the learning phase of the machine learning process;
